

光学变色材料 Optical Variable Pigments

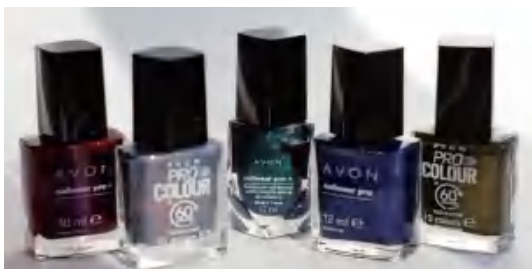

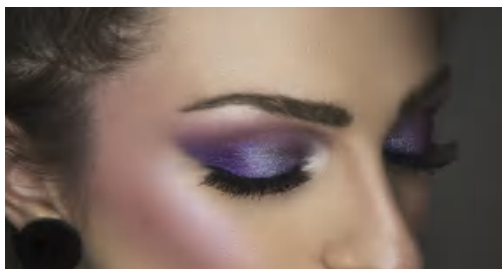

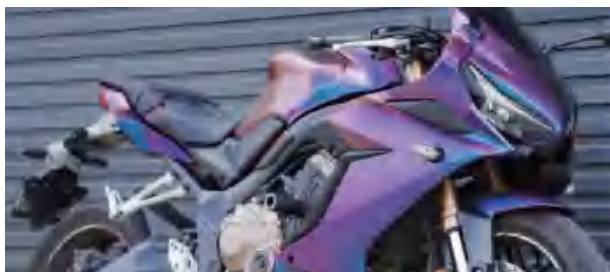

产品介绍 *Product Introduction*

光学变色材料，基于物理光学原理展现奇妙色彩，安全环保且永不褪色。旭阳新材生产的高亮实色系列高亮度与强遮盖力兼备，色彩夺目；透明彩色系列高亮度和高透明性并存。二者都有强烈的随角异色特性和独特金属闪烁效果，能全色域覆盖红、橙、黄、绿、青、蓝、紫、金、银等，共 30 余款颜色。应用于防伪印刷、化妆品、汽车改色、皮革鞋材等众多行业。

Optical Variable Pigments, based on the principles of physical optics, offer captivating visual effects while being environmentally friendly, safe, and resistant to fading. Sunrise's High-Brightness Solid Colour Series combines exceptional brightness with superior coverage, delivering striking and vivid colours. The Transparent Colour Series achieves high brightness alongside excellent transparency. Both series exhibit a strong colour-shifting effect depending on the viewing angle and feature a distinctive metallic sparkle. They cover the entire colour range - including red, orange, yellow, green, cyan, blue, purple, gold, silver and more, offering over 30 colours. These pigments are suitable for various applications, including anti-counterfeit printing, cosmetics, automotive customisation, leather shoes and other industries.
